

Charging at work

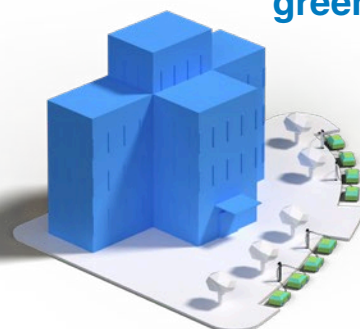

EV Charging solution for workplaces

Why it is a good idea to install EV chargers at your company?

- Offer **premium service** to your employees and visitors.
- Improve your brand image becoming a sustainable and **modern company**.
- **Attract talent** to your company with these extra services.
- **Get tax benefits.**

Attract talent offering extra services while becoming a **greener company!**

Take the leap to electromobility!

Charging at work *EV Charging solution for workplaces*

Our added value proposition for corporate workplaces

If you are thinking about installing EV Chargers at your company, **Circontrol is the best choice**. We not only provide the charging points, but also solutions to minimize your investment and the opex of an EV fleet.

Our solution is **scalable** and easily upgradeable as EV uptake increases. It also avoids blackout or increasing the contracted energy as **the power used for charging can be adjusted dynamically** based on the real facility consumption.

Apart from that, with our solution you will be **able to monitor your chargers and its performance**, providing full control of the different profiles (employees, visitors, corporate fleet...) and their consumption in case you want to bill them in the future.

If you want to provide even a greater worker experience, we can **provide parking guidance and regulated led lightning** to reduce time to park and electricity consumption.

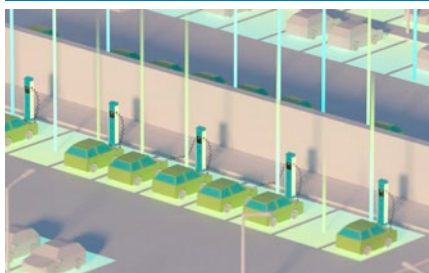

Circontrol solution for workplaces

Charging Points

Cutting edge technology in single or three phase, from 7.4 kW up to 22kW.

COSMOS

Cloud based platform for monitoring and reporting.

DLM (Dynamic Load Management)

Software to simultaneously charge several EVs in less time using the available power more efficiently.

We have a solution for you!

You do not have to worry about the project, the installation or the maintenance!
We have a big partner network all over the world that will be in charge of it!
